

90-Day Sovereign Capacity Sprint

Facilitated Execution of Your American System Operating Plan

For leadership teams ready to move from free frameworks to real traction.

WHAT THIS IS

A fixed-scope, 90-day implementation engagement that turns the free module outlines and 90-day action plans into a living operating rhythm for your business.

You already have the tools. This is the facilitated version — diagnosis, prioritization, ownership, and cadence — so the plan actually runs.

WHAT YOU RECEIVE

- A customized 90-day plan built from the free outlines you already used
- 2–3 focused working sessions to diagnose, rewrite priorities, roles, and metrics, and lock ownership
- A clear tracking cadence for the full 90 days
- Light check-ins during the sprint to keep momentum

This is execution support, not another set of slides.

WHO IT IS FOR

- Leadership teams already using (or open to) EOS, OKRs, or similar operating systems
- Companies that have engaged with the free Hamiltonian modules and want help turning them into action
- Organizations that need productive capacity, high-skill American workforce alignment, and directed improvement

INVESTMENT

Standard rate: \$12,500 – \$15,000

Introductory offer: \$6,000 – \$9,500

HOW IT WORKS

1. Complete (or already have) one of the free module diagnostics and 90-day outlines.
2. Schedule a short fit conversation.
3. Run the sprint: diagnosis → ownership lock → 90-day cadence.
4. Leave with a plan your team actually owns and can run.

NEXT STEP

Message to schedule a short fit conversation.

If the sprint is not the right next move, we will say so.
